

CIS — Z Bank · DSSBOaT Corporate Officer v1.0

Component Integration Specification — Client due-diligence profile

Field	Value
Document ID	CIS-Z-BANK-DSSBOAT-OFFICER-v1
Version	1.0
Status	Draft
Platform	OneX Bridge / Z Bank Online
Source CIS PDF	docs/cis/DSSBOAT_CIS_2026.pdf
Parent CIS	CIS-Z-Bank-Online-v1.md
Date of source CIS	21 February 2025

1. Purpose and scope

This CIS onboard **DSSBOaT Ltd Trading as DS Group** as a Z Bank corporate client and defines the **authorized officer** (signatory) who may operate Z Bank accounts with **PIN + wet/typed signature** authentication.

Prepared with reference to Articles 2–5 of the Due Diligence Convention, the Criminal Justice (Money Laundering and Terrorist Financing) Act 2010 (as amended), and Central Bank of Ireland AML/CFT guidance, for identity and funds-origin verification with banks and other financial institutions — subject to agreement by the Client and all individuals named herein, and indefinite confidentiality obligations.

In scope

- Corporate identity of DSSBOaT Ltd (Ireland)
- Officer / signatory profile (Bernard Greeff Niehaus, CEO)
- Z Bank officer APIs: register/list/status, PIN + signature verify, authorized transfers
- Linkage to Z Bank M1–M4 ledger accounts

Out of scope

- Storing passport scan images in ledger JSON (PDF remains the evidentiary attachment)
- Full third-party KYC vendor orchestration
- Nova Bank branding or seeds

2. Client corporate information

Field	Value
Company name	DSSBOaT Ltd Trading as DS Group
Country of incorporation	Ireland
Corporate registration	725265
Date of registration	2 September 2022
Company address	92 George's Street Lower, Dún Laoghaire, Dublin, Ireland, A96 VR66

3. Officer and signatory

Field	Value
Officer name	Bernard Greeff Niehaus
Officer position	CEO / Founder
Passport nationality	New Zealander
Passport number	LK986067
Passport date of issue	28 April 2017
Passport date of expiry	28 April 2027
Date of birth	29 May 1982
Residential address	340 Whitford Road, Howick, Auckland NZ
Email	bniehaus@dssalus.com
Phone	+447425940224
System officer ID	dssboat-officer-bneihaus

Affirmation (per source CIS): the officer affirms under penalty of perjury that the information and attachments are true in all material respects as of the date of signing.

4. Officer bank authentication (PIN & signature)

Z Bank officer operations require **both** factors. There are **no demo defaults** in production.

Factor	Rule	Storage
PIN	4-8 digits	SHA-256 hash (onex-zbank-officer-pin: + pin + : + officer salt) — never stored in plaintext
Signature	Typed signature passphrase / signature code (≥ 8 chars)	SHA-256 hash (onex-zbank-officer-sig: + normalized signature + : + officer salt)

Authorized transfers (POST /bridge/bank/officer/transfer) must include officerId , pin , and signature . Mutating officer endpoints require X-OneX-Api-Key when the bridge API key is configured.

4.1 Production bootstrap

1. Copy deploy/env.zbank.production.example → /etc/onex/onex.env
2. Set real values (operator only; never commit):

```
ONEX_LEDGER_MODE=production
ONEX_PAYMENT_GATEWAY_PROVIDER=stripe
ONEX_ZBANK_OFFICERS_FILE=configs/zbank-officers.dssboat.example.json
ONEX_ZBANK_OFFICER_PIN=<4-8-digit-pin>
ONEX_ZBANK_OFFICER_SIGNATURE=<min-8-char-signature>
ONEX_STRIPE_SECRET_KEY=sk_live_...
ONEX_STRIPE_PUBLISHABLE_KEY=pk_live_...
ONEX_STRIPE_WEBHOOK_SECRET=whsec_...
```

1. Seed officer credentials:

```
curl -s -X POST -H "X-OneX-Api-Key: $ONEX_API_KEY" https://HOST/bridge/bank/officer/ensure
```

1. Confirm productionReady: true:

```
curl -s https://HOST/bridge/bank/officer/status | jq .
```

Rotate later via `POST /bridge/bank/officer/credentials` (requires current PIN + signature).

5. Linked Z Bank accounts

Default linked accounts (M1–M4 operational layers):

Account ID	Layer	Role
zbank-usd-checking	M1	Spendable operating wallet
zbank-usd-safeguarded	M2	Safeguarded settlement
zbank-usd-treasury	M3	Treasury liquidity
zbank-usd-wholesale	M4	Wholesale / tokenized

6. API contract

Method	Endpoint	Purpose
GET	<code>/bridge/bank/officer/status</code>	Officer store health + counts
GET	<code>/bridge/bank/officer/list</code>	List officers (no secrets)
GET	<code>/bridge/bank/officer?id=</code>	Public officer profile
POST	<code>/bridge/bank/officer/verify</code>	Verify PIN + signature
POST	<code>/bridge/bank/officer/transfer</code>	Authorized Z Bank transfer (PIN + signature required)
POST	<code>/bridge/bank/officer/ensure</code>	Seed DSSBOaT officer from config file

6.1 Verify request

```
{
  "officerId": "dssboat-officer-bneihaus",
  "pin": "<production-pin>",
  "signature": "<production-signature>"
}
```

6.2 Authorized transfer request

```
{
  "officerId": "dssboat-officer-bneihaus",
  "pin": "<production-pin>",
  "signature": "<production-signature>",
  "fromAccount": "zbank-usd-checking",
  "toAccount": "zbank-usd-safeguarded",
  "amount": "1000.00",
  "reference": "DSSBOAT-ops-001"
}
```

7. Attachments

File	Description
<code>docs/cis/DSSBOAT_CIS_2026.pdf</code>	Original Company Information Sheet + passport pages
<code>configs/zbank-officers.dssboat.example.json</code>	Machine-readable officer seed

8. Verify after deploy

```
curl -s https://HOST/bridge/bank/officer/status | jq .
curl -s https://HOST/bridge/bank/officer/list | jq .
curl -s -X POST https://HOST/bridge/bank/officer/verify \
  -H 'Content-Type: application/json' \
  -d '{"officerId":"dssboat-officer-bneihaus","pin":"...","signature":"..."}'
```
